

How Many Canadians Are Employed, and How Many Unemployed?

Persons 15 and over, seasonally adjusted · July 2026: 21.21M employed, 1.45M unemployed

Notes: Counts of people aged 15 and over, seasonally adjusted - not rates. Unemployed means without work and either actively looking for it or on temporary layoff. The two panels have SEPARATE vertical scales, employment being 15 times the size of unemployment, so each panel shows its own movement rather than the two side by side.
