

Where Is Unemployment Highest Right Now?

Unemployment rate by sector · July 2026 · average across these sectors 3.4% (dashed)

Notes: Unemployed as a share of each sector's labour force. The dashed line is the labour-force-weighted average of the sectors shown, not Canada's headline rate: this table counts people by the industry of their last job, so anyone who never worked or last worked over a year ago is in neither. Not shown: Utilities — Statistics Canada suppressed the estimate for this month.
