

Energy Inflation (Canada)

Consumer prices for energy and for gasoline, change from a year earlier · Latest: July 2026

Notes: Year-over-year change in the Consumer Price Index. Energy is the wider basket - gasoline plus natural gas, electricity, fuel oil and other fuels - so gasoline is one component of it, not a separate category, which is why the two lines move together and gasoline swings further. Shaded: recessions (C.D. Howe Business Cycle Council). Source: Statistics Canada, Table 18-10-0004 (vectors v41691239, v41691136). Released 17 Aug 2026. Retrieved 17 Aug 2026.
