

Who Gets to Own: America's Homeownership Rate

Latest: Q2 2026

Notes: Share of households that own their home, quarterly. The 2000s bubble pushed it to 69% and the bust unwound it; it has not returned to that peak. The Q2-2020 jump is a collection artefact, not a change in ownership: the Census Bureau suspended in-person interviewing in March 2020 and says the resulting non-response shift likely drove that quarter's historically large increase. Shaded bars: NBER recessions.
